# Investment Approach: Rigor of Buying a Business

## **Business Selection:**

Our starting point of any investment is to study and understand the business thready as we are business investors, which means investment to us is like buying a business. We invest in quality businesses that we understand well and which are likely to generate improvement in earnings and cash flows in the foreseeable future and avoid ones facing headwinds.

## **Judgement of Business cycles:**

Our understanding of global macroeconomics along with the judgement of economic and business cycles helps us to endeavour to remain ahead of the curve in our investments. We may be a bit early in our investment and may have to wait for the businesses to bear fruit but have generally found them to be very rewarding with higher IRRs.

## **Margin of Safety:**

Being early in identifying themes/stocks allows us the 'Margin of Safety' that we require before we invest. This entails that we will not shy away from being contrarian provided we are able to identify triggers for improvement in earnings and/or rerating of sector/stocks.

Thus, Investing in quality, growing businesses with desired margin of safety ensures capital protection, lower volatility and generates superior returns over a period of time.

# Investment Approach

## Quality companies in growth markets:

- Strong franchises + good/ethical managements
- Large market opportunities, strong competitive characteristics and high ROE
- Industry leaders
- Hunger for growth

## Risk conscious approach:

- Valuation Risk
- Earnings Risk
- Balance Sheet Risk
- Over-ownership risk

**Deep Research & Flexibility**

## Our investment principles:

- Absolute return mindset
- Asymmetric risk return approach
- Undiscovered/underperformed
- Disciplined approach to selling

## Flexible Approach:

- Combine top down and bottom up approach
- Capitalising on occasional tactical opportunities
- Ability to use cash as a hedge

# Our Investment Approach helps us focus on...

- ▶ Asymmetric risk : reward
- ▶ Earning inflection points
- ▶ High margin of safety
- ▶ Growth and earning tailwinds
- ▶ Disciplined selling: the most crucial and difficult part of investing
  - Run up in stocks & valuations getting rich
  - Significant change in investment rationale

## Majority of PMS schemes outperformed Nifty, BSE 500 in FY24

**Ashley Coutinho**  
Mumbai

The majority of portfolio management services (PMS) schemes outperformed the benchmark Nifty 50 and BSE 500 in the financial year 2024 amid a rally in mid and small-cap stocks.

As much as 80 per cent or 264 of the 324 schemes were able to beat the returns generated by Nifty, data from PMS Bazaar show. The schemes delivered average returns of 45.2 per cent, higher than the 30.1 per cent delivered by Nifty.

As much as 56 per cent of the schemes outperformed the BSE 500, which returned 40.2 per cent. Only 30 schemes, however, were able to beat the returns of 70 per cent given by Nifty Smallcap 100 in FY24.

Invasset's Growth Pro Max Fund, a multi-cap strategy, was the top performer in FY24 with returns of 128.5 per cent, followed by Green Lantern Capital's Growth Fund (110.8 per cent) and Asit C Mehta Investment Intermediates' Ace -Multicap (102.7 per cent).

Marcellus's Little Champs, a small-cap strategy, was the

worst performer with returns of 0.3 per cent. Ambit Investment Advisors' Emerging Gi-

ants and Eklavya Capital Advisors' Long Term Value were the other two schemes near

the bottom with returns of 11.5 per cent and 13.4 per cent, respectively. Most of the

PMS schemes tend to adopt concentrated portfolios, which can work both ways. If a few of the calls go wrong, the overall performance can be hit. In 2018-19, several wealthy individuals migrated from mutual funds to PMS in search of alpha. Many of the PMS schemes, barring the top-performing ones, had struggled to deliver alpha in the following years.

### AT A DISADVANTAGE

PMS investors are at a little disadvantage *vis-a-vis* mutual funds on the taxation and fees front. Investors have to pay an additional tax of 0.6-0.8 per

cent on the PMS schemes *vis-a-vis* equity MFs since all transactions happen on their respective trading accounts. In certain cases, they have to shell out profit shares to the manager if returns are over a certain hurdle rate.

PMS schemes managed ₹26.9-lakh crore under the discretionary portfolio, ₹2.6 lakh-crore under the non-discretionary portfolio, and ₹2.7 lakh-crore under advisory, latest regulatory data showed.

The PMS segment invests money on behalf of wealthy individuals. The minimum investment under the regulations is ₹50 lakh.

### 297 SCHEMES TOGETHER GIVE AVERAGE RETURNS OF -0.1%

## Over half of PMS schemes underperform Nifty in FY23

Mumbai, April 18

THE MAJORITY of the portfolio management services (PMS) schemes underperformed the Nifty 50 in FY23 amid sustained market volatility. As many as 56%, or 165 of the 297 PMS schemes were not able to beat the returns generated by the benchmark.

The 297 schemes collectively delivered average returns of -0.1%, slightly higher than the -0.6% given by the benchmark. Twenty-two schemes delivered double-digit returns during the year.

This means a typical investor with four-six schemes in his portfolio probably would have not been able to beat Nifty returns in the last year.

Among individual categories, large-cap PMS schemes (average returns of -0.1%), multi-cap schemes (-0.03%) and small-cap PMS schemes (0.3%) outperformed their respective benchmarks. Mid-cap ones (-0.04%) underperformed benchmark. Nifty Midcap 100 (1.15%). Most PMS schemes tend to adopt concentrated portfolios, which can work both ways. If few of the calls go wrong, it can hit overall performance, said experts. Hem Securities' India Rising SMF Stars, a small-cap strategy, was the top performer for FY23 with returns of 34.3%, followed by Mole-

cule Ventures' Growth strategy (28.8%) and Green Lantern Capital's Growth Fund (22.1%).

Rasant Maheshwari Wealth Adviser's Equity Fund was the worst performer with returns of -26.2%, followed by Turtle Wealth's 21.2% Growth Mantta (-24.4%) and Lake Water Advisors' India Growth strategy (-20.9%). Three Motilal Oswal strategies — Focused Midcap, IOP and IOP V2 — were among the 10 worst performers.

In 2018-19, a number of wealthy individuals migrated from mutual funds to PMS in search of alpha. Many schemes, barring top performing ones, have not delivered alpha. "A more meaningful picture will emerge once the respective bench-

marks for different PMS categories come into play. To get a better idea of which schemes are performing, they need to get broken down further into specific buckets," said Sarvesh Kamdar, founder & CEO, Smart Money. The Association of Portfolio Managers in India has fixed benchmarks for equity, debt, hybrid and multi-asset PMS strategies, which will be effective from April 1.

PMS investors are at a little disadvantage *vis-a-vis* mutual funds on the taxation and fees front. Investors have to pay an additional tax of 0.6-0.8% on PMS schemes *vis-a-vis* equity MFs since all transactions happen on their respective trading accounts. In certain cases, they have to shell out profit share to the manager if returns

are over a certain hurdle rate.

According to experts, quality and growth kind of strategies have particularly suffered in the past year with value stocks gaining the spotlight. PSUs, banks and industrials have done better than quality and growth names in the FMCG and IT space, where stocks have become pricey. IT shares, for instance, rose substantially post-Covid, but corrected in the past year on rich valuations and on realisation that some of the growth assumptions during the pandemic may not materialise going forward.

PMS schemes managed ₹22.9 trillion under the discretionary portfolio, ₹1.7 trillion under non-discretionary, and ₹2.2 trillion under advisory, latest regulatory data showed.
